Contents

Overview

1 Introduction

2 The Energy Efficient Computing Device

- 2.1 Operational Modes And Terminology
- 2.2 Benchmark
- 2.3 The Average Computer

3 Energy Efficient Standards And Eco Labelling Schemes

- 3.1 Benefits of Eco-Labels
- 3.2 Energy Efficiency Standards Organisations
  - 3.2.1 Energy Star
  - 3.2.2 EU Eco Label
  - 3.2.3 IEEE 1680-2006
  - 3.2.4 Ecma International
  - 3.2.5 The Swedish Confederation Of Professional Employees (TCO)
  - 3.2.6 New Zealand Environmental Choice
  - 3.2.7 Canadian Environmental Choice
  - 3.2.8 German Blue Angel
  - 3.2.9 Japanese Eco Mark
  - 3.2.10 Japanese Ecoleaf
  - 3.2.11 Thai Green Label
  - 3.2.12 IT Eco Declaration – Norway, Denmark, Sweden
  - 3.2.13 Korean Eco Label
  - 3.2.14 Taiwanese Green Mark
  - 3.2.15 Group For Energy Efficient Appliances (GEEA)
  - 3.2.16 Swiss Ordinances On Standby Power

4 Green Computing Initiatives

- 4.1 80 Plus
- 4.2 Climate Savers Computing Initiative (CSCI)
- 4.3 The Green Grid
- 4.4 Linux Foundation's Green Linux Initiative
- 4.5 The Electronic Product Environmental Assessment Tool (EPEAT)

5 Low Emission IT Technology

- 5.1 Lower Power And Power-Efficient Processors
- 5.2 Server Based Computing
  - 5.2.1 Server Based Computing With Thin Clients
  - 5.2.2 Server Based Computing As A Business Service
  - 5.2.3 Server Technology Using Low Power Processors
- 5.3 Power Supply And Management
  - 5.3.1 Switch Mode Power Supplies
  - 5.3.2 Fan-less Power Supplies
  - 5.3.3 Power Supply In Data Centres

5.4 Power Management Software

5.4.1 AMD Power Now
5.4.2 Energy Star EZ Wizard
5.4.3 Intel PowerTop
5.4.4 Verdiem Surveyor

5.5 Cooling

5.5.1 Casing Based Heat Sinks
5.5.2 Liquid Submersion Cooling

5.6 Massive Array Of Idle Disks (MAID)
5.7 Virtualisation
5.8 Monitors – CRT and LCD
5.9 Telecommuting Enablers

6 Other Options

6.1 System Upgrades
6.2 Carbon Offsetting

7 Impact Of Current Low-Emission IT On Emission Reduction Targets

8 The Market For Low Emission IT

9 Conclusions

10 Vendor Profiles

10.1 NEC Computers
10.2 Verdiem
10.3 Rackable Systems
10.4 Intel
