

Contents

Overview

1 Introduction

2 Intermittence

3 Energy Storage Systems

3.1 Electricity Storage

3.1.1 Pumped Hydro

3.1.2 Compressed Air Storage

3.1.3 Batteries

3.1.4 Fuel Cells And Hydrogen

Fuel Cells As Energy Stores

Fuel Cells As Electricity Generators

3.1.5 Flow Batteries

3.1.6 Supercapacitors

3.1.7 Superconducting Magnetic Energy Storage

3.1.8 Flywheel Energy Storage

3.2 Thermal Storage

3.2.1 Rock Based

3.2.2 Water Based

Seasonal Thermal Storage

Solar Ponds

3.2.3 Phase Change Material Based

3.3 Fuel From Biomass

4 The Market For Renewable Energy Storage

4.1 Market Inhibitors

4.1.1 Competitors On Both Fronts

4.1.2 Predicting Availability

4.1.3 Improved Grid Architecture

4.2 Market Drivers

4.2.1 Take Your Partners

4.2.2 An Enabling Technology

5 Urban Heat Islands

5.1 Ten Degrees Of Difference

5.2 London Underground – A Man Made Geothermal System

5.3 Micro-climates

6 Conclusions

7 Vendor Profiles

7.1 D1 Oils

7.2 Wind Hydrogen

7.3 Ballard Power Systems

7.4 Ooms

7.5 Pentadyne
